► About Awesome Analytics

Every hour that an automation saves is an hour that can be spent with family, with yourself to live the only life that we have. We elevate lives with automation.

A decade of experience in Application Development, Automation and Analytics.

We are a team of professionals from finance & IT knowledge with a decade of expertise in designing and deploying automations.

While we do have expertise in Microsoft, Google & open-source tools we do not restrict ourselves to specific technologies.

Solving the problem is the first priority. Any technology that works, with a reasonable cost benefit ratio is a win-win situation.

We have serviced clients in 20+ cities in India, UAE, Singapore & Africa.

We have worked with clients in sectors such as FMCG, Bio-Tech, Real Estate, FinTech, Govt Agencies, Media, CA Firms

We love technology since you can automate your work & elevate your life thus, enabling people to do their core activities while tech handles the rest.
